

**Use case: digital and physical file protection**  
1: Distributing and sharing validated files

The university validates the diplomas that it publishes for its students

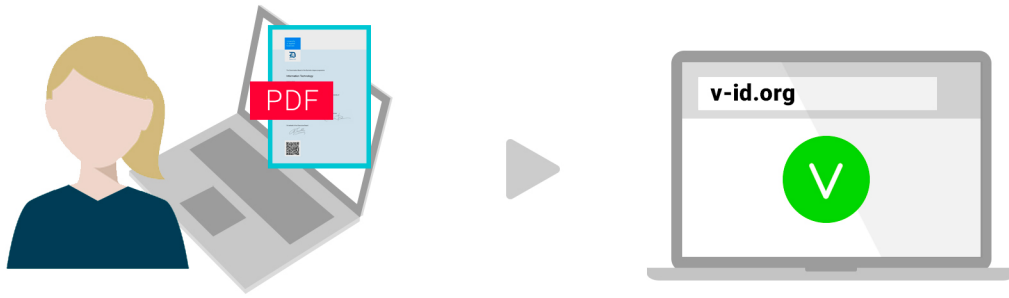

Graduates receive additional validated digital versions of their diploma's

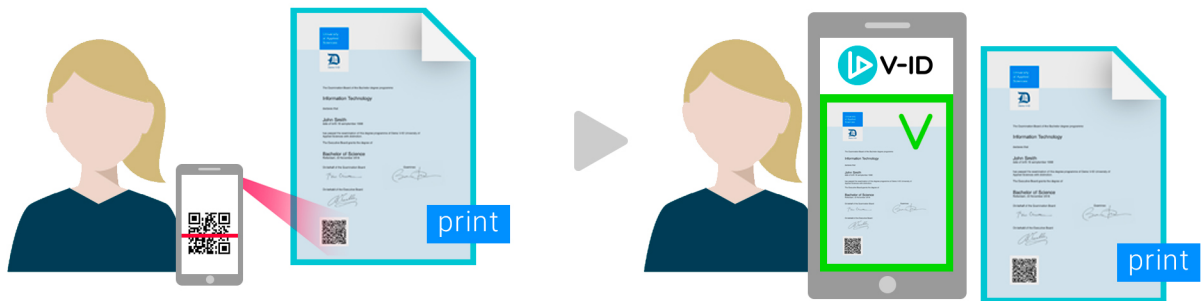

Graduates can freely share digital or printed copies of their diploma

**Use case: digital and physical file protection**  
2: Verifying digital or physical files

Recipients of the digital file can check its integrity **in 5 seconds** on v-id.org

Recipients of a printed copy can check its integrity by scanning the QR code, and comparing the content visually with the validated file that V-ID shows as the result of the scan

*The validated file is hosted on the publishers' server. V-ID does not host the files that it validates, and therefore complies with GDPR regulations*
